Name: Oneeka Kundu Roll.No.:129 ExamRoll:11600223145

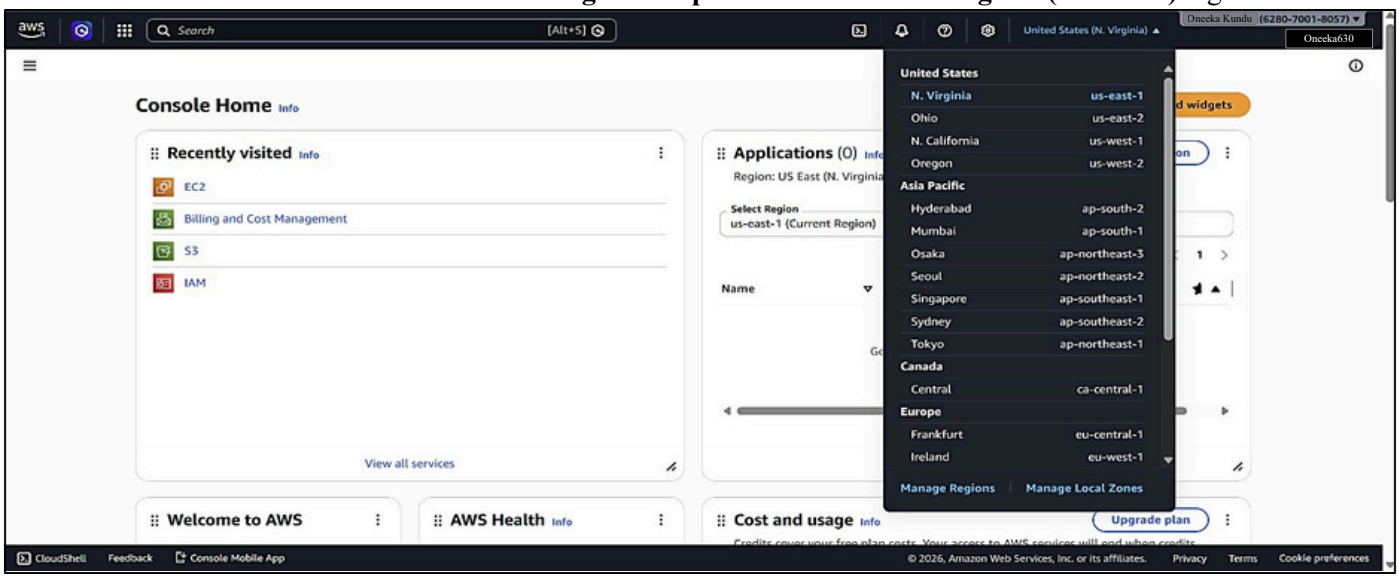
Assignment No.: 13

Problem Statement: Create a WorkMail for your Organization.

Solution: **Step 1: AWSAccount Login** Open web browser → Go to

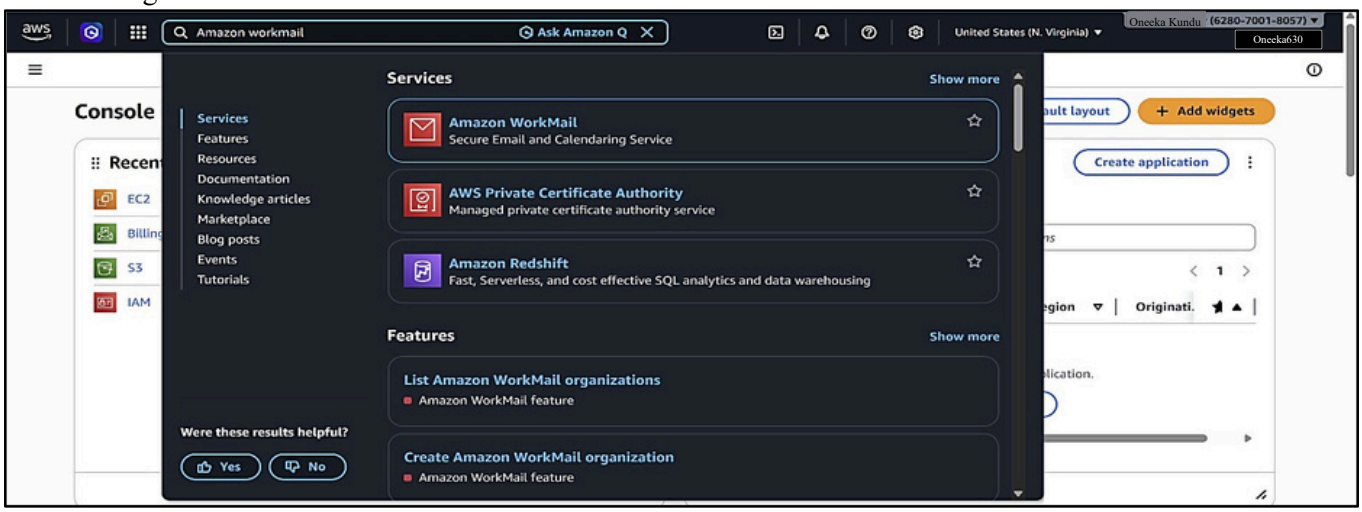
https://aws.amazon.com → Login / Sign up to AWS account. **Step 2: ChangeAWS Region**

AWSConsoleHomepage→Topright corner **Region Dropdown** → Select **N. Virginia (us-east-1)** region.



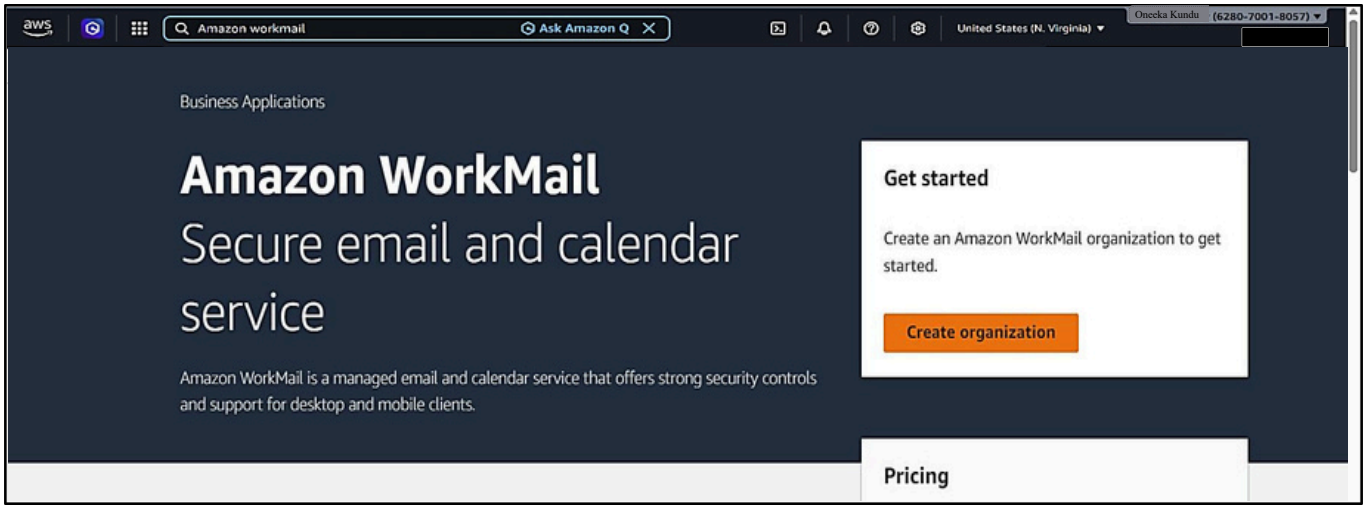
Step 3: Open AWS WorkMail Service

AWS Management Console → Search **WorkMail** in the search bar → Click **Amazon WorkMail**.



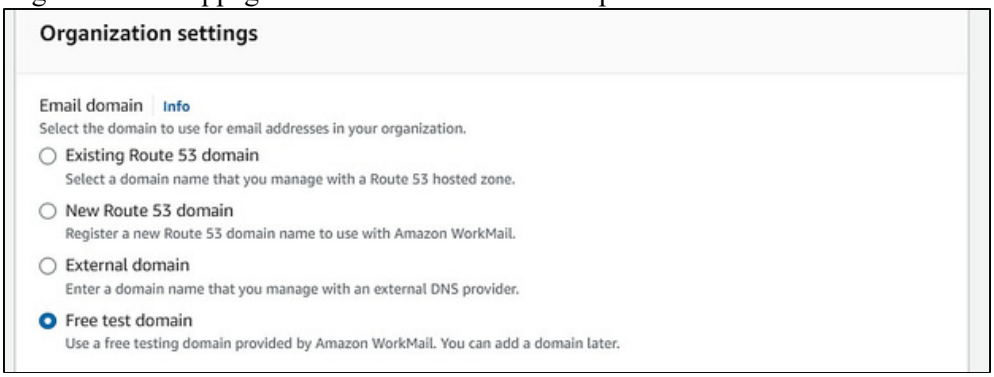
Step 4: Create WorkMail Organization

Amazon WorkMail Dashboard → Click **Create Organization**.



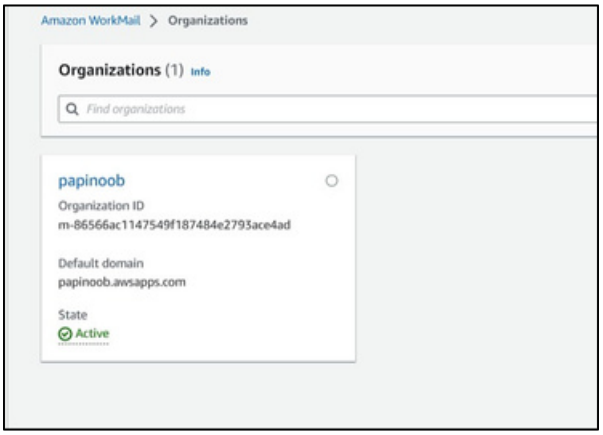
Step 5: Select Domain Type

Organizationsetuppage→Select Free test domain option under Email Domain



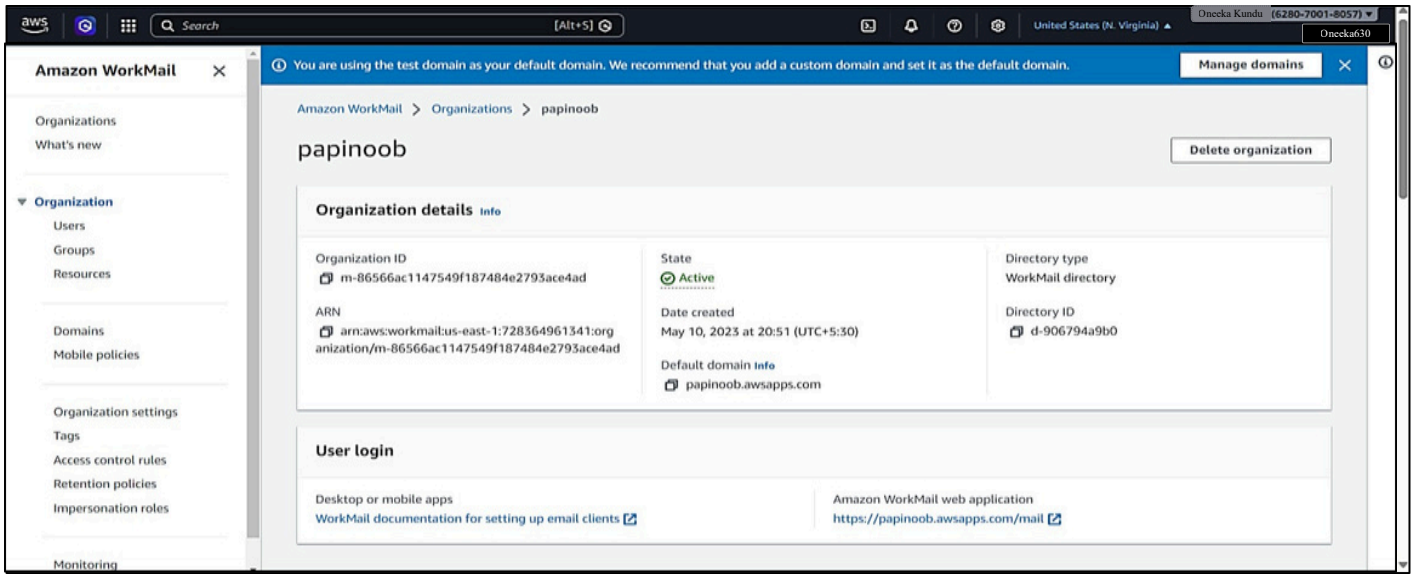
Step 6: Configure Organization Details

Enter **OrganizationName / Aliase(e.g.papinoob)** → Click **Create Organization**.



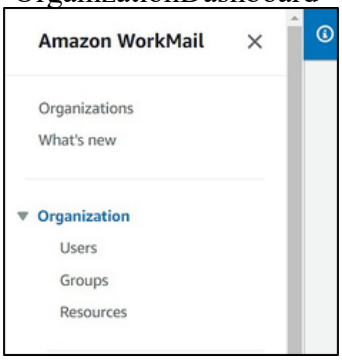
Step 7: Wait for Organization Creation

Wait approximately 2 minutes until the organization status becomes Active → Click on the Organization Name.



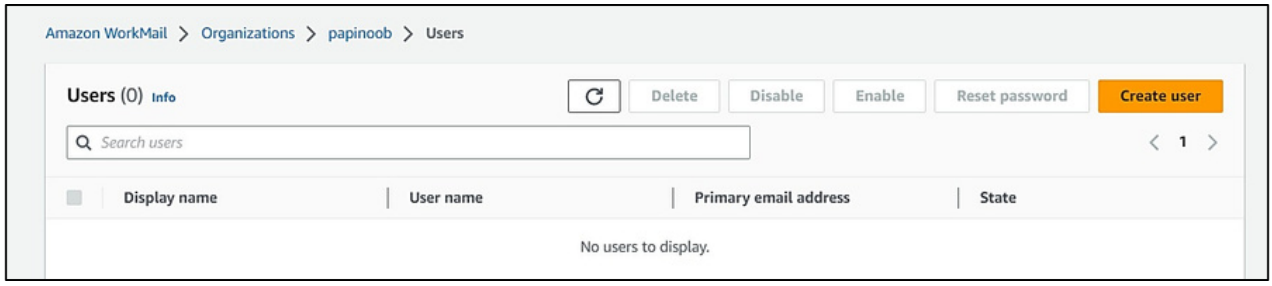
Step 8: Open Users Section

OrganizationDashboard→Left navigation panel → Click **Users**.

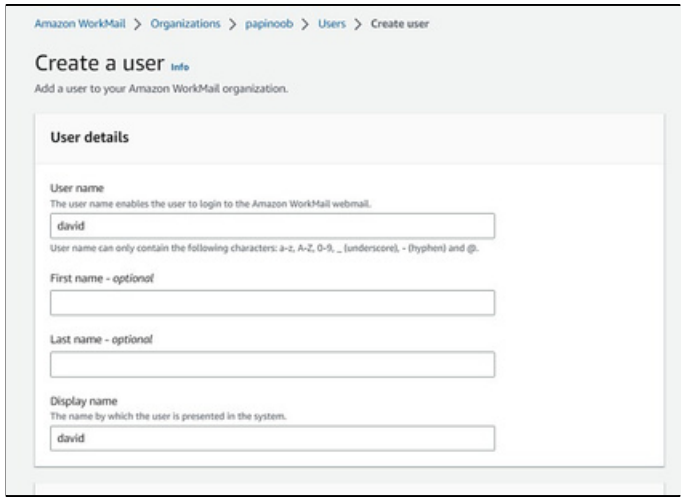


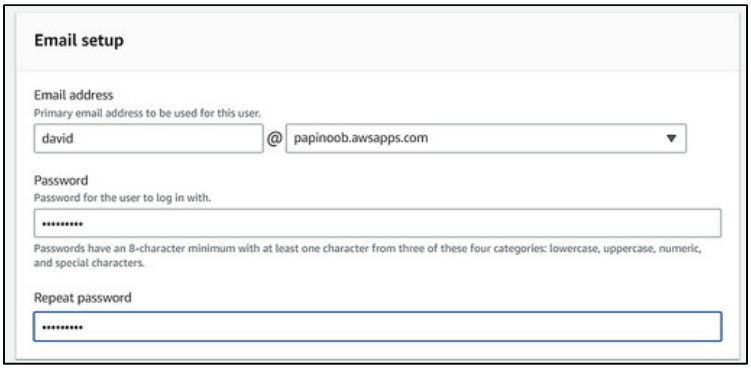
Step 9: Create New User

Userssection →Click Create User → Enter the following details:
Username → Display Name → Password → Click Create User



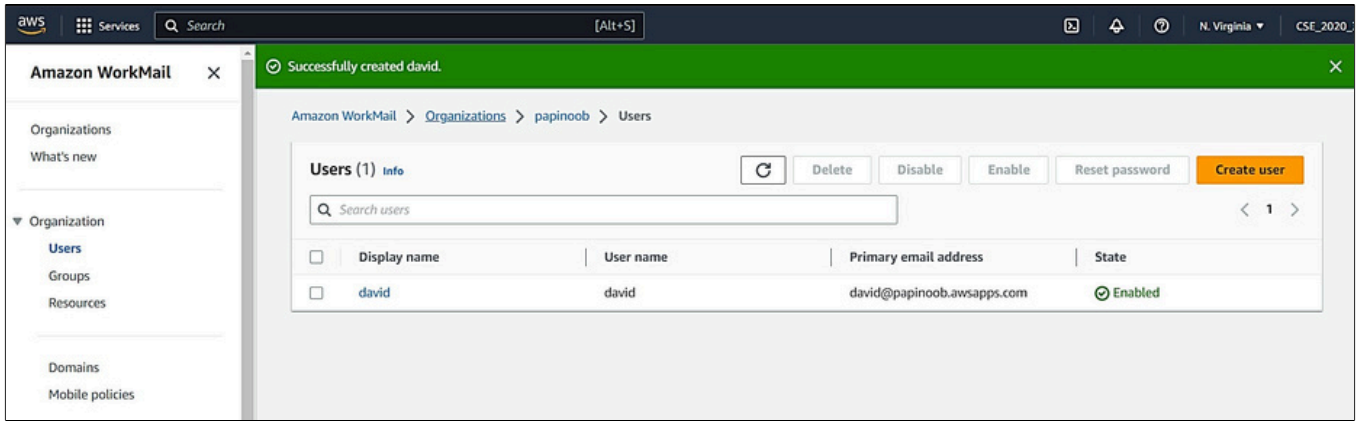
Give username(david).Then give a **display name**. Then provide the **password**.

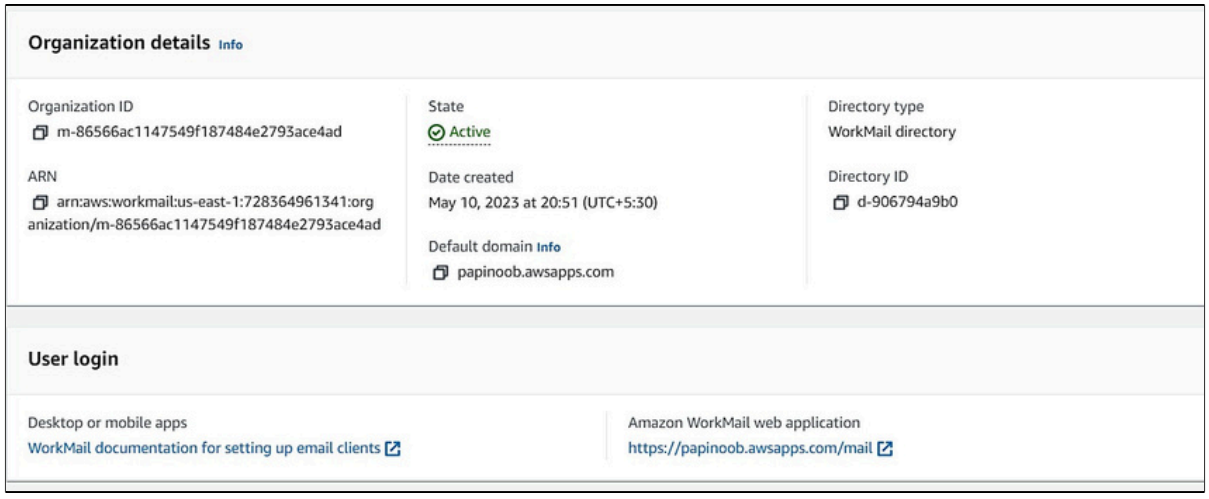




Step 10: Open WorkMail Web Application

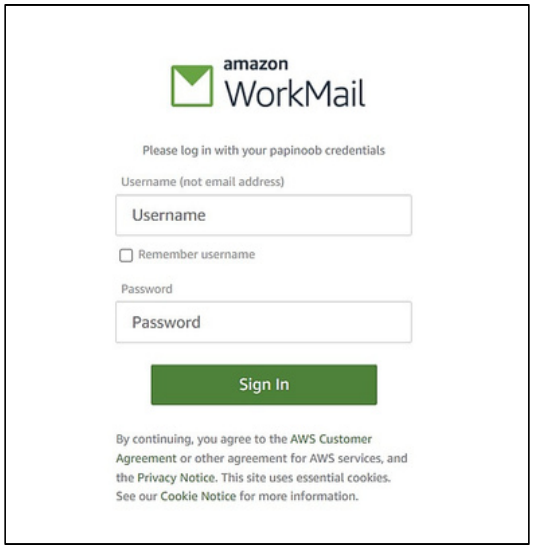
ReturntoOrganizationPage→ClickAmazonWorkMail Web Application link.





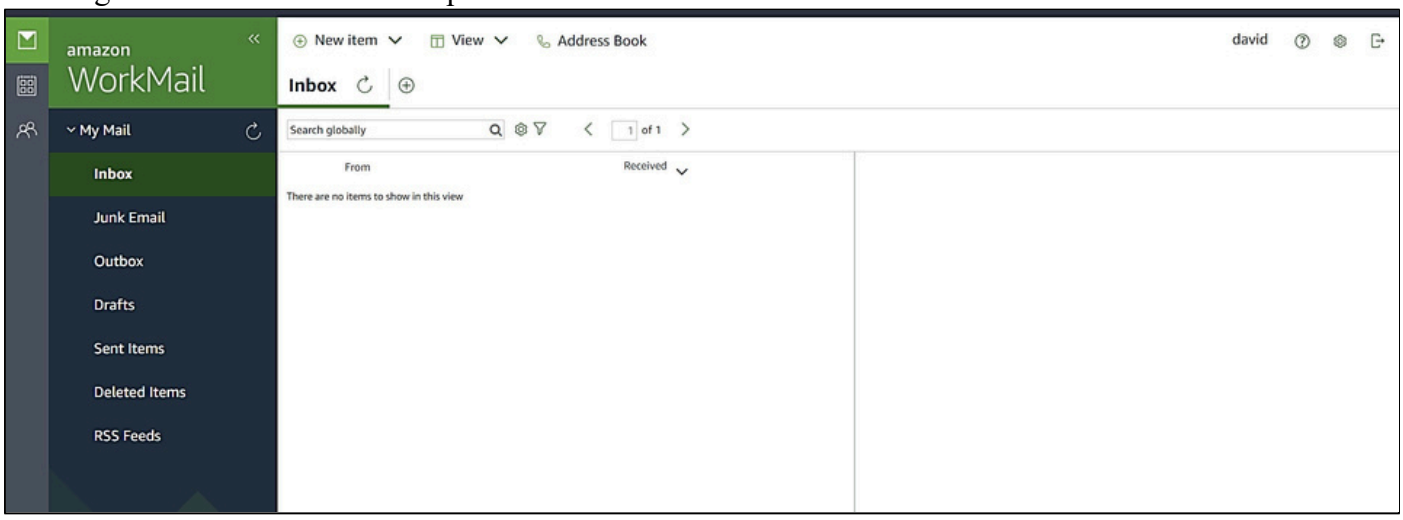
Step 11: Login to WorkMail

WorkMailloginpage→EnterUsername and Password created earlier → Click Sign In.



Step 12: Verify Mailbox Access

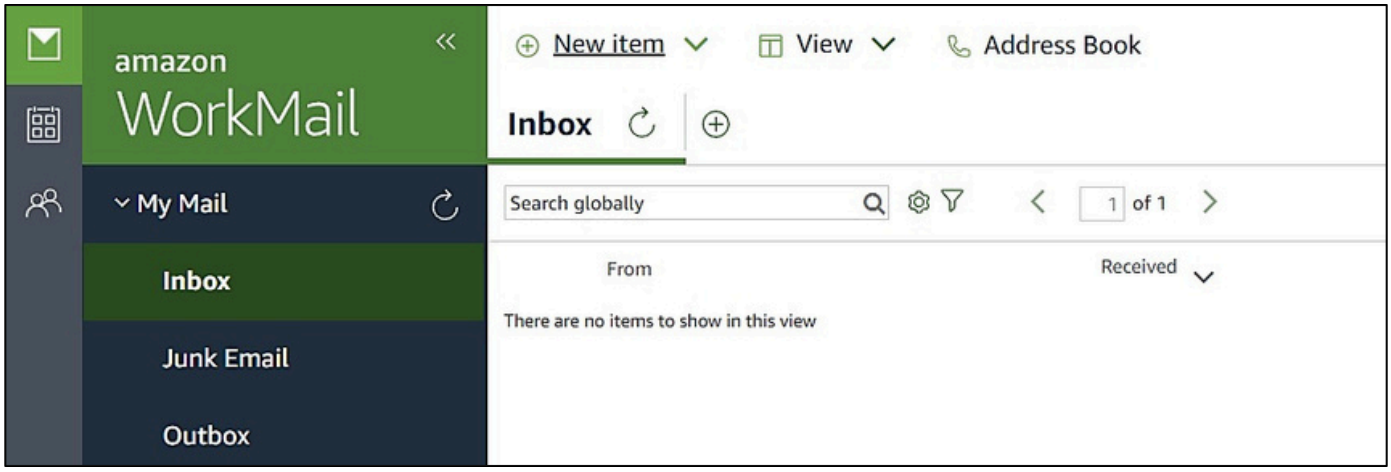
Afterlogin→WorkMailinboxwill open for the created user.



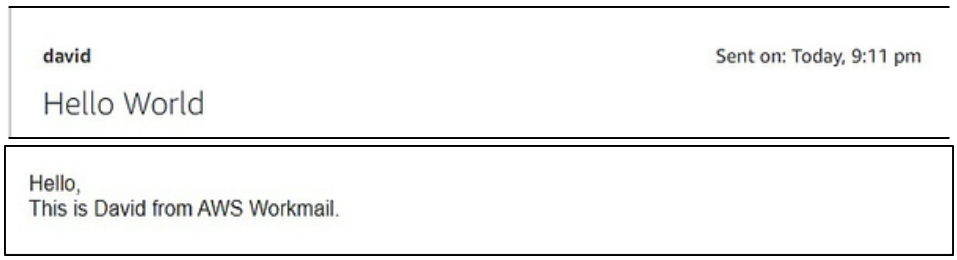
Now let's **test** our mail server by seeing whether it can **send** and **receive mail**.Send some mail to your Gmail from this by creating a mail using the new item option.

Step 13: Send Test Email

WorkMail interface→Click New Email / New Item → Enter your Gmail address → Write a message → Click Send.

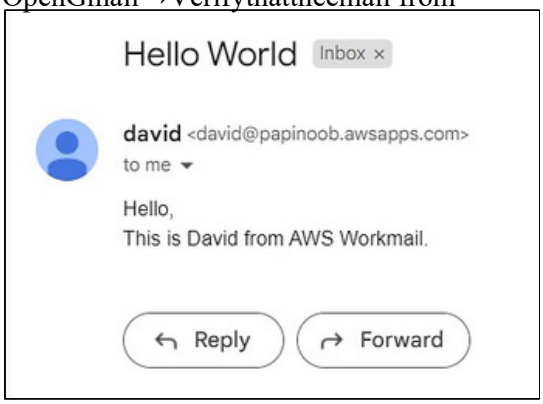


Select **new email**. Now write an **email** to your **Gmail address**.



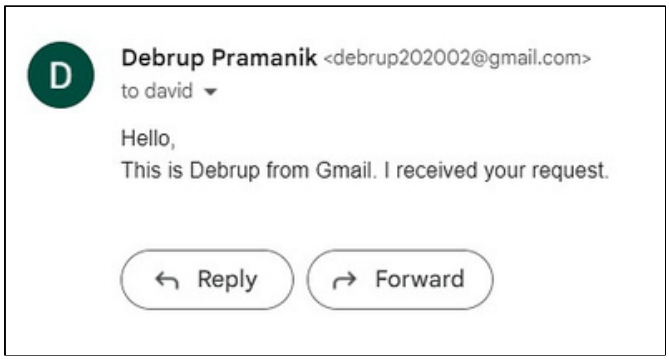
Step 14: Check Gmail Inbox

OpenGmail→Verifythattheemail from **AWS WorkMail account** has been received.



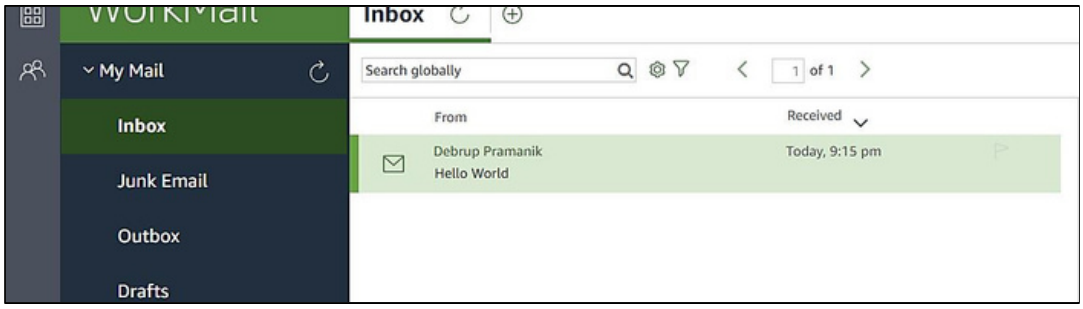
Step 15: Reply to WorkMail

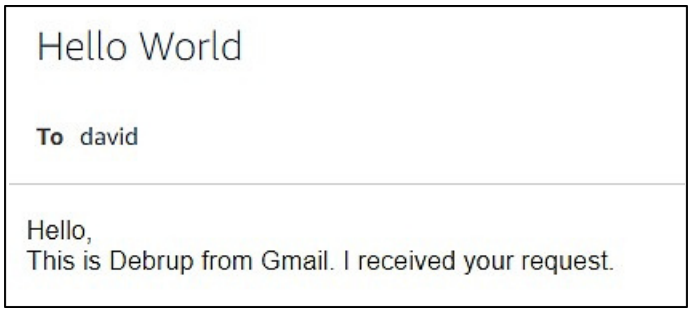
Reply to the received email from Gmail → Send the reply.



Step 16: VerifyWorkMail Inbox

Return to WorkMail Inbox → Confirm that the reply email is received successfully.





AWS WorkMail was successfully configured andemails were sent and received successfully.
