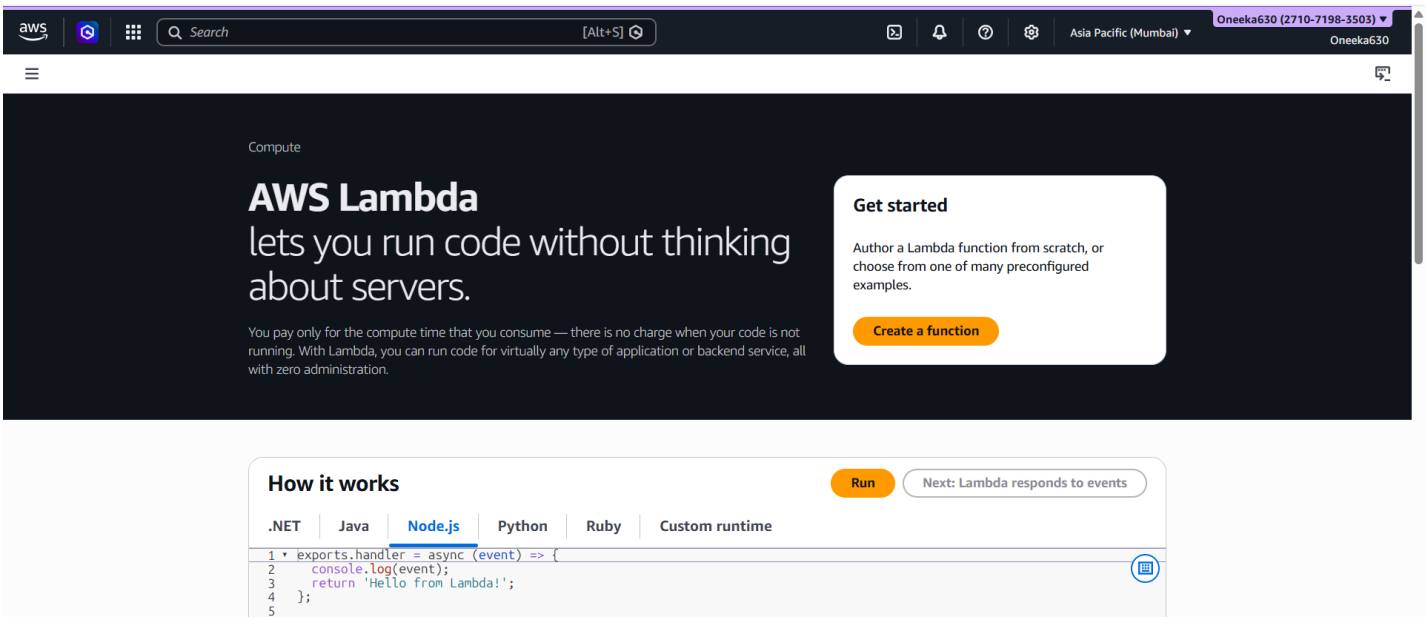
NAME :ONEEKA KUNDU **ROLL:129** **EXAMROLL:11600223145**

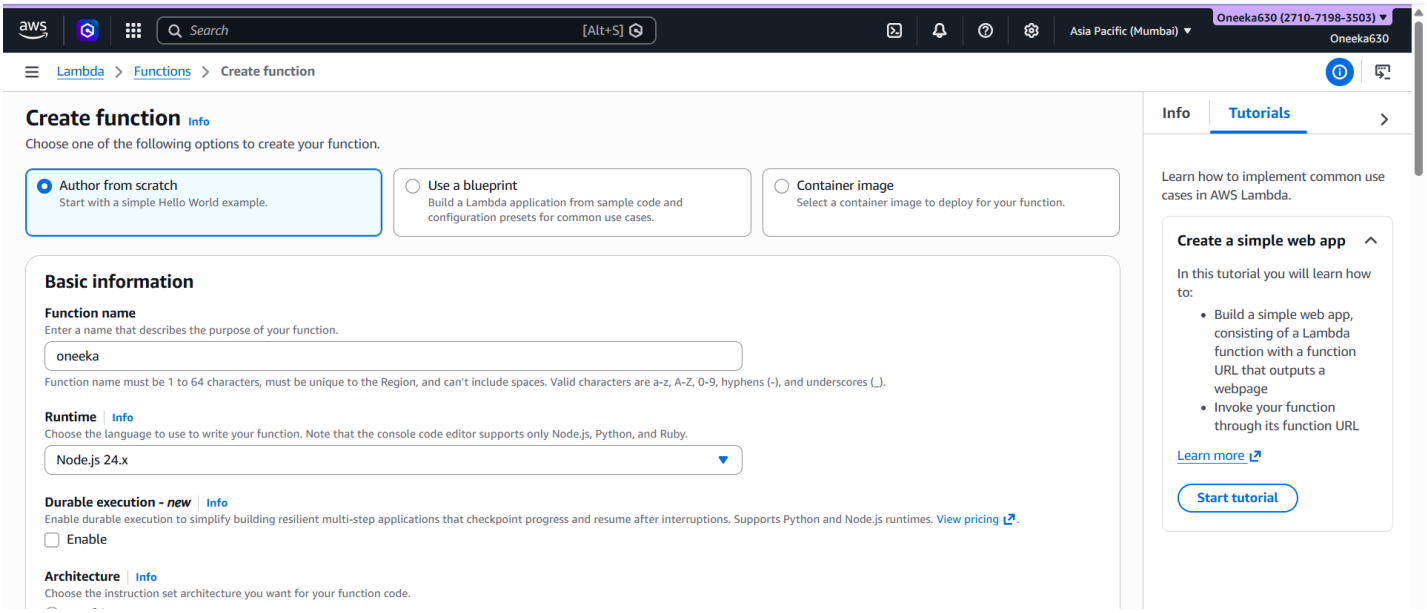
ASSIGNMENT: 14

PROBLEM STATEMENT: Create a serverless computing service.

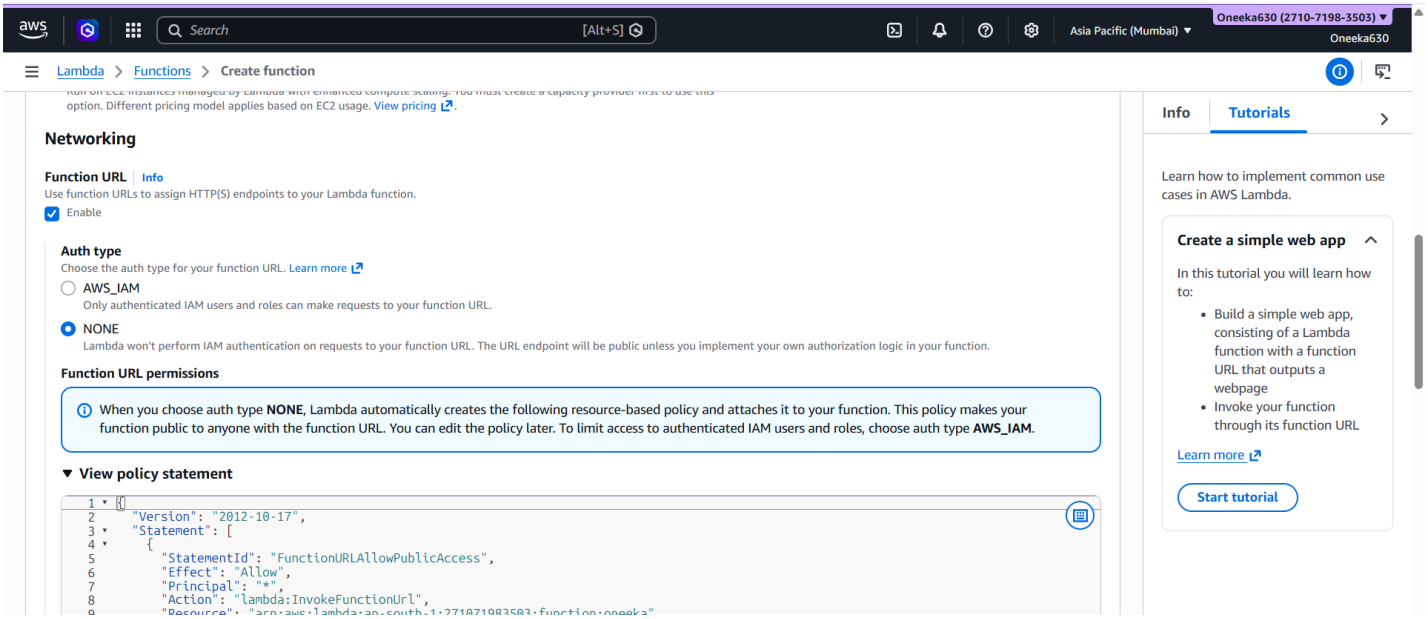
1. Search for ‘Lambda’ and click on it.



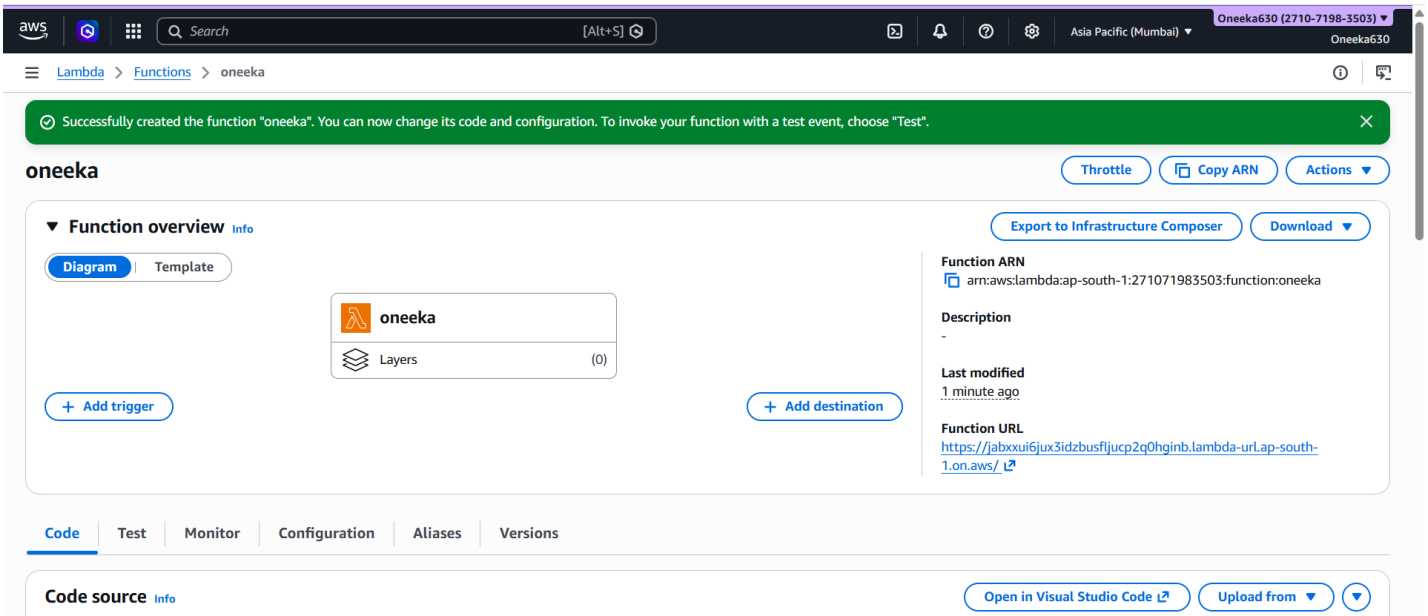
2. Click on ‘**Create a function’** button. Give a name to the function and under runtime select node.js.



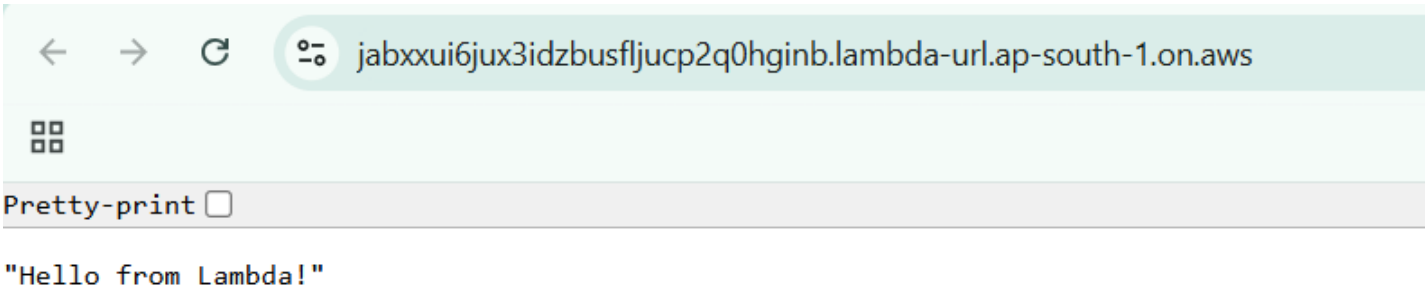
4. check the **Enable Function URL** checkbox & under Auth type, select **NONE**. Then click on **Create Function**.



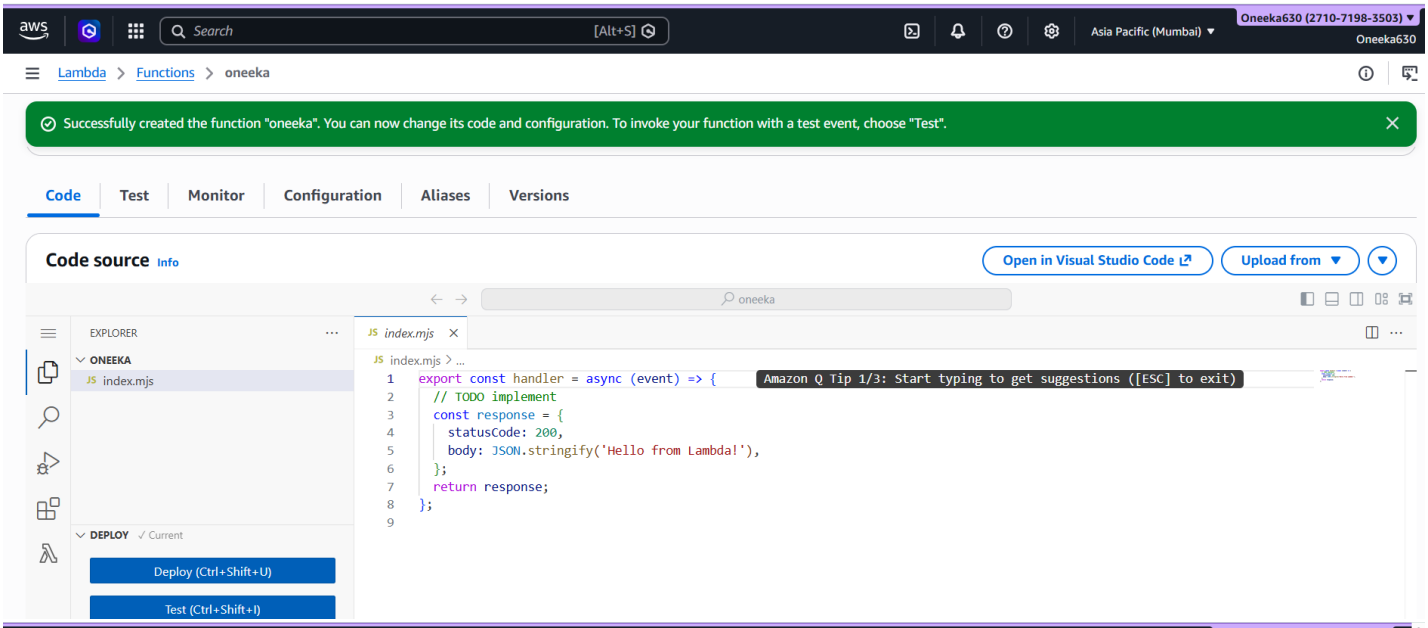
5. The function has been created. Now copy the function URL and paste it on a new tab.

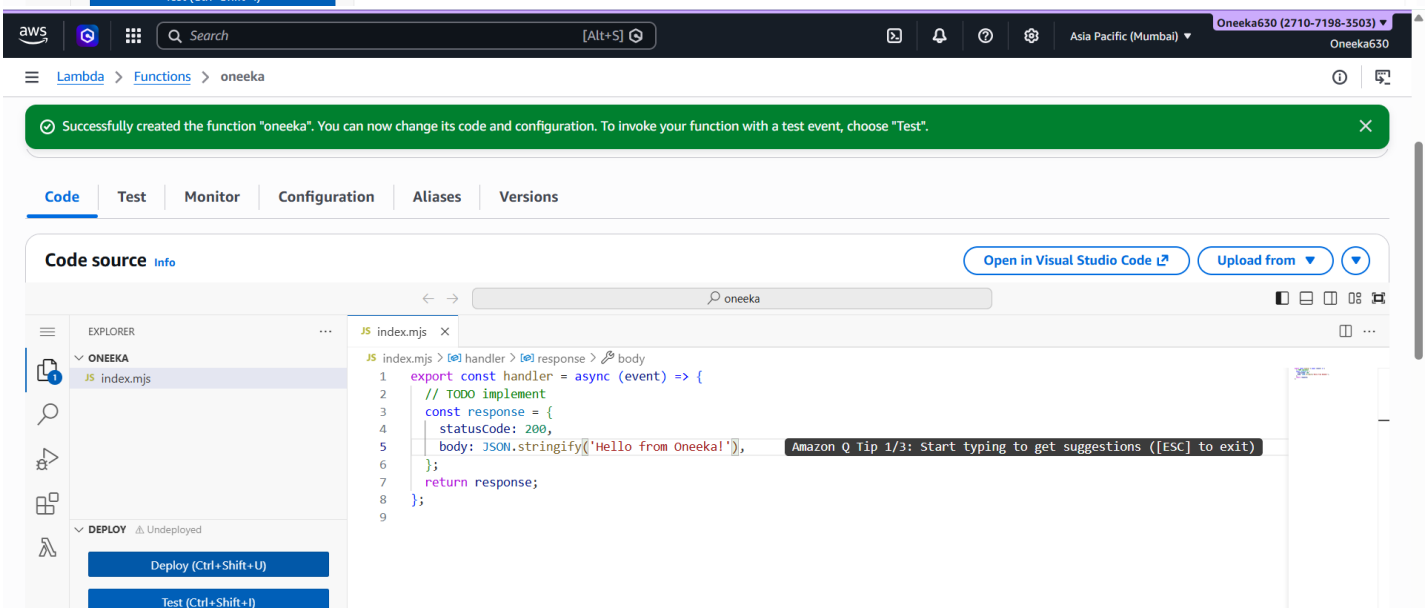


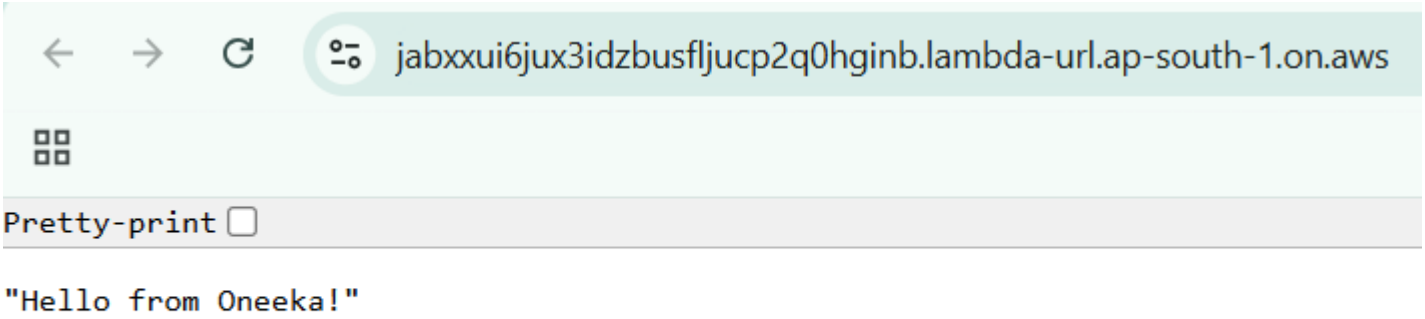
6. The following output should be obtained.



7.Make some changes in the code where you can notice visible change as for me I have change lambda into Oneeka .After change click on the deploy button and **Deploy**







8.Again chck the function URL .Paste it on an empty tab and see the visible change .
